SUMMARY

Enthusiastic Computer Science student with strong skills in Python and Java. Passionate about software development, solving problems, and Data Structure. Seeking an opportunity to leverage my technical skills and experience in software development

TECHNICAL SKILLS

Programming Languages: Java, Python, HTML, Basic JavaScript
Concepts: Data Structures and Algorithms, OOP
Database: MySQL
Libraries & Tools: Informatica, Git/ GitHub

PROJECTS

Detecting Web Attacks With End To End Deep Learning:

• Developed an end-to-end deep learning system to detect web attacks from raw HTTP request data.

• Used models like CNN and LSTM to automatically learn features without manual intervention.

• Targeted common web threats such as SQL injection, XSS, and command injection.

Online Depression and Detection:

• Developed a web-based application that detects signs of depression using user inputs such as text, voice, or questionnaire responses.

• Utilized Natural Language Processing (NLP) and machine learning/deep learning models to analyze emotional tone, sentiment,

• Integrated standardized screening tools like PHQ-9 for reliable assessment of mental health status and instant feedback.

Smart Car Parking and Number Plate Recognition using ai and Computer Vision:

. Developed a automated parking management system using AI and Computer Vision

. Used models like ANPR to record vehicle details parking slot availability and managing entry and exit without human.

EDUCATION

Malla Reddy Institute of Engineering and Technology, Hyderabad 2023 - 2026

B-Tech in Computer Science-(CGPA-8.8)

Jyothishmathi Institute of Science and Technology,Karimnagar 2020 - 2023

Diploma in Computer Science-(CGPA-8.8)

Vidyodaya High School, Jammikunta 2019 - 2020

SSC-(Percentage-10.0)

INTERNSHIP / WORK EXPERIENCE

- **AI-ML Virtual Internship**

Completed AI/ML Virtual Internship with hands-on experience in building and evaluating machine learning models using Python and real-world datasets
